GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Wind turbine control, PG_00065618		
Field of study	Naval Architecture and Offshore Structures		
Date of commencement of studies	February 2026	Academic year of realisation of subject	2026/2027
Education level	second-cycle studies	Subject group	Specialty subject group Subject group related to scientific research in the field of study
Mode of study	Full-time studies	Mode of delivery	at the university
Year of study	1	Language of instruction	Polish
Semester of study	2	ECTS credits	3.0
Learning profile	general academic profile	Assessment form	assessment
Conducting unit	Division of Automation and Marine Energy -> Institute of Naval Architecture -> Faculty of Mechanical Engineering and Ship Technology -> Wydziały Politechniki Gdańskiej		
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Mohammad Ghaemi	
	Teachers		

Lesson types and methods of instruction

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	15.0	0.0	15.0	0.0	0.0	30

E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	30	8.0	37.0	75

Subject objectives

Learning the basic concepts of wind turbine control systems, the method of modeling, analysis and synthesis of these systems in conjunction with operational aspects, and acquiring the ability to applycontrol systems in industrial practice in the field of offshore energy systems with an emphasis on wind farms.

Learning outcomes

Course outcome	Subject outcome	Method of verification
[K7_U04] creatively designs or modifies, either entirely or in part, a shipborne or offshore system or process according to a given specification, considering both technical and non-technical aspects, estimating costs and adopting design techniques representative for the field	Creatively designs or modifies, in whole or in part, wind turbine control systems according to given technical specifications and operational requirements, considering both technical and non-technical aspects.	[SU3] Assessment of ability to use knowledge gained from the subject
[K7_U81] is able to communicate with ease in foreign language at B2+ level of the Common European Framework of Reference for Languages (CEFR) in everyday life, in academic and professional environments	Has the ability to communicate fluently in English at the B2+ CEFR level on topics related to wind turbine control, enabling participation in technical discussions and presenting analysis and research results.	[SU1] Assessment of task fulfilment
[K7_U82] is able to proficiently obtain and process information related to field of study and academic environment in foreign language at B2+ level of the Common European Framework of Reference for Languages (CEFR)	Has the ability to efficiently acquire and process information in English at the B2+ CEFR level, related to wind turbine control, including technical literature, standards, and research findings.	[SU1] Assessment of task fulfilment

<table>
<tr><td>Subject contents</td><td>1. Introduction, goal, nomenclature, definitions, basic concepts and types of control systems
2. Modeling a wind turbine as an object of a control system, including mechanical, aerodynamic and electrical subsystems
3. Modeling of wind influence as an input variable of the control system
4. Influenec of wind turbine operational aspects including energy conversion, mechanical load, power quality and operating modes, on the analysis and synthesis of control system
5. Wind turbine control strategies and methods, including yaw control, active pitch regulation, load control, stall control, aileron control, and generator slip control
6. Analysis and synthesis of selected control systems of wind turbines</td></tr>
<tr><td>Prerequisites and co-requisites</td><td>Basic information on automation and control systems at B.Sc. level in the Ocean Eng. field</td></tr>
<tr><td>Assessment methods and criteria</td><td><table>
<tr><th>Subject passing criteria</th><th>Passing threshold</th><th>Percentage of the final grade</th></tr>
<tr><td>Lab. report</td><td>50.0%</td><td>48.0%</td></tr>
<tr><td>Attendance</td><td>0.0%</td><td>4.0%</td></tr>
<tr><td>Test/colloquium</td><td>50.0%</td><td>48.0%</td></tr>
