

Subject card

Subject name and code	Normative quality management systems, PG_00064731								
Field of study	Management and Production Engineering								
Date of commencement of studies	February 2026		Academic year of realisation of subject			2026/2027			
Education level	second-cycle studies		Subject group			Specialty subject group Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	1		Language of instruction			Polish			
Semester of study	2		ECTS credits		4.0				
Learning profile	general academic profile		Assessme	Assessment form		assessment			
Conducting unit	Faculty of Management and Economics -> Wydziały Politechniki Gdańskiej								
Name and surname	Subject supervisor		dr hab. inż. Piotr Grudowski						
of lecturer (lecturers)	Teachers								
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
	Number of study hours	30.0	0.0	15.0	15.0		0.0	60	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity Participation i classes including plan				Self-study		SUM		
	Number of study hours	60		9.0		31.0		100	
Subject objectives	Getting khnowlage of quality, safety and environmental management systems. Acquiring the ability to design and implement these systems in organizations.								

Data wygenerowania: 15.06.2025 22:10 Strona 1 z 3

earning outcomes Course outcome		Method of verification				
[K7_U04] creatively designs or modifies, in whole or at least in part, production and technological systems and processes, in accordance with the given specifications, taking into account technical and non-technical aspects, estimating costs and using known design techniques appropriate for tasks in the field of Management and Production Engineering	The student, using his/her knowledge and skills, is able to create and implement documentation regarding Normative Management Systems.	[SU5] Assessment of ability to present the results of task				
[K7_K11] is aware of importance of professional acting, the need for critical verification of acquired knowledge and consulting experts opinion in case of facing difficulties with individual problem solving	The student is able to analyze documentation regarding Normative Management Systems, improve it and implement it in the organization.	[SK5] Assessment of ability to solve problems that arise in practice				
[K7_U14] integrates information obtained from literature and other properly selected sources, including those in a foreign language, creatively interpreting and critically evaluating them, and drawing conclusions	The student is able to analyze normative and scientific studies in order to develop documentation for process improvement.	[SU1] Assessment of task fulfilment				
[K7_W03] demonstrates structured and theoretically based knowledge covering key issues in the field of Management and Production Engineering enabling the design and synthesis of stationary and non-stationary systems, devices and technological processes with continuous and discrete operation	The student has knowledge of the structure of Normative Management Systems and is able to use his/her knowledge to improve processes.	[SW1] Assessment of factual knowledge				
Normative Management Systems of the ISO series; 2. The context of the organization in ISO Management Systems; 3. Leadership - its role in ISO Management Systems; 4. Planning requirements in ISO Management Systems; 5. Supporting the resources of the organization in the context of ISO 9001; 6. Determining the requirements for products and services in the organization; 7. Planning and design of development in the context of ISO 9001; 8. Audit - a process improvement tool in the context of ISO management systems; 9. Improving processes, products and services.						
Basic knowledge of methods and too	ols used to design and improve proce	esses.				
Subject passing criteria	Passing threshold	Percentage of the final grade				
Midterm colloquium	60.0%	50.0%				
Lab	60.0%	50.0%				
1. Materials from the lecture placed on the e-learning platform 2. Grudowski P. Designing, supervising and improving the quality system according to the PN-EN ISO 9001: 2009 standard based on a process approach						
	[K7_U04] creatively designs or modifies, in whole or at least in part, production and technological systems and processes, in accordance with the given specifications, taking into account technical and non-technical aspects, estimating costs and using known design techniques appropriate for tasks in the field of Management and Production Engineering [K7_K11] is aware of importance of professional acting, the need for critical verification of acquired knowledge and consulting experts opinion in case of facing difficulties with individual problem solving [K7_U14] integrates information obtained from literature and other properly selected sources, including those in a foreign language, creatively interpreting and critically evaluating them, and drawing conclusions [K7_W03] demonstrates structured and theoretically based knowledge covering key issues in the field of Management and Production Engineering enabling the design and synthesis of stationary and non-stationary systems, devices and technological processes with continuous and discrete operation 1. Normative Management Systems Systems;3. Leadership - its role in IS Systems;5. Supporting the resourcer requirements for products and service context of ISO 9001;8. Audit - a production text of ISO 9001;8. Audit - a production processes, products and service context of ISO 9001;8. Audit - a production processes, products and service context of ISO 9001;8. Audit - a production processes, products and service context of ISO 9001;8. Audit - a production processes, products and service context of ISO 9001;8. Audit - a production processes, products and service context of ISO 9001;8. Audit - a production processes, products and service context of ISO 9001;8.
