

Subject card

Subject name and code	, PG_00062234						
Field of study	Civil Engineering						
Date of commencement of studies	February 2025		Academic year of realisation of subject		2025/2026		
Education level	second-cycle studies		Subject group				
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Engineering Structures -> Faculty of Civil and Environmental Engineering -> Wydział Politechniki Gdańskiej						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Arkadiusz Sitarski				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	0.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		0.0		0.0	45
Subject objectives	• learning techniques and technology of building bridges						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_U06] is able to choose proper tools (measuring, analytical or numerical) to solve engineering problems, to acquire, filtrate, proces and analyse data		The student is able to recognize the type of bridge structure and will analyze the possibilities of its creation in terms of construction and calculations		[SU3] Assessment of ability to use knowledge gained from the subject [SU2] Assessment of ability to analyse information		
	[K7_W13] has knowledge on state of the art methods on knowledge acquisition, filtration, processing and analysis		The student is able and partially knows the programs for computer model analysis, including analysis of bridge construction conditions.		[SW2] Assessment of knowledge contained in presentation [SW3] Assessment of knowledge contained in written work and projects		
Subject contents	Contemporary methods of concrete bridges erection. Classification of constructing technology, choice criteria. Precasting. Scaffolding and shuttering construction. System scaffolding. Steel bridges. Classification by materials, construction type (cross- sections). Choice of static scheme, choice criteria. Technical and economical characteristics of construction methods. Methods of bridge structures fabrication. Laying out, cutting, welding of large size elements. Assembly methods (traditional and large-size). Possibilities and choice criteria. Bridge equipment and its influence on structure durability.						
Prerequisites and co-requisites	Subject: Bridges and Tunnels						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Midterm colloquium		60.0%		50.0%		
	Project tutorials		60.0%		50.0%
