

Subject card

Subject name and code	GLOBAL DIGITAL TRANSFORMATION, PG_00070740						
Field of study	Engineering Management						
Date of commencement of studies	October 2026	Academic year of realisation of subject				2028/2029	
Education level	first-cycle studies	Subject group				Obligatory subject group in the field of study Subject group related to scientific research in the field of study	
Mode of study	Part-time studies	Mode of delivery				at the university	
Year of study	3	Language of instruction				Polish	
Semester of study	6	ECTS credits				4.0	
Learning profile	general academic profile	Assessment form				assessment	
Conducting unit	Department of Informatics In Management -> Faculty of Management and Economics -> Faculties of Gdańsk University of Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr Tomasz Janowski					
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	18.0	0.0	9.0	0.0	0.0	27
	E-learning hours included: 0.0						
	eNauczanie source address: <a href="https://enauzanie.pg.edu.pl/moodle/course/view.php?id=47434">https://enauzanie.pg.edu.pl/moodle/course/view.php?id=47434</a>						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	27		3.0		70.0	100
Subject objectives	Preparing students to analyze and critically evaluate global digital transformation processes, based on knowledge of technological, social, economic, and political development, and to formulate and present conclusions based on reliable information sources in the context of global development trends.						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	[K6_K01] is ready to fulfill professional roles responsibly, taking legal, ethical, and cultural aspects into account in decision-making processes.		is ready to perform professional roles in digital environments in a responsible manner, taking into account legal, ethical, and cultural dimensions of digital transformation, including data protection, algorithmic decision-making, and cross-cultural diversity.			[SK2] Assessment of progress of work [SK1] Assessment of group work skills	
	[K6_W03] knows reliable sources of information and utilizes advanced knowledge to explain contemporary management issues.		knows and understands the key features, determinants, conditions, and directions of development of the global digital transformation and its significance for social, economic, and political processes, using reliable sources of information for the critical analysis of phenomena.			[SW1] Assessment of factual knowledge	
	[K6_U07] uses advanced information technologies to enhance data analysis and management processes.		is able to apply advanced information technologies to analyse data and design improvements in management processes within the context of global digital transformation, using analytical tools and decision-support solutions.			[SU1] Assessment of task fulfilment [SU5] Assessment of ability to present the results of task	

Subject contents	<p>Course content – lecture</p> <ol style="list-style-type: none"> <li>1. CONCEPT - What is digital transformation (DT) about?</li> <li>2. LANDSCAPE - How is DT progressing around the world?</li> <li>3. FEATURES - What features define DT?</li> <li>4. DYNAMICS - What are DT conditions, mechanisms, and outcomes?</li> <li>5. INNOVATION - How is DT enabling digital innovation?</li> <li>6. ECONOMICS - How is DT generating productivity, wealth, and inequality?</li> <li>7. IMPACT - What is DT impact by type, scope, and target?</li> <li>8. SUSTAINABILITY - What is sustainable DT? What is DT for sustainability?</li> </ol>		
	<p>Course content – laboratory</p> <p>GROUP PROJECT - Digital transformation analysis of a selected country</p> <ol style="list-style-type: none"> <li>1. Introduction, group formation, country selection, literature discovery</li> <li>2. Analysis by area: <ul style="list-style-type: none"> <li>• digital infrastructure and connectivity</li> <li>• legal, regulatory, and policy environment</li> <li>• human capital, skills, and inclusion</li> <li>• government and public sector transformation</li> <li>• economy and business digitalization</li> <li>• governance and leadership</li> </ul> </li> <li>3. Presentation and discussion</li> </ol> <p>INDIVIDUAL PROJECT - How is the country tackling a selected social problem using digital transformation?</p> <ol style="list-style-type: none"> <li>1. Problem selection, research plan, literature gathering</li> <li>2. Analysis: <ul style="list-style-type: none"> <li>• policy problem</li> <li>• policy stakeholders</li> <li>• strategy for addressing the problem</li> <li>• strategy implementation</li> <li>• impact and outcomes</li> <li>• challenges and risks</li> </ul> </li> <li>3. Presentation and discussion</li> </ol>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Assessment of the ability to collaboratively develop and present an analysis of global digital transformation using reliable data sources (group project).	60.0%	20.0%
	Assessment of the ability to independently analyze a selected aspect of global digital transformation and formulate coherent conclusions (individual project).	60.0%	20.0%
	Assessment of ongoing analytical engagement in discussions on global digital transformation issues (activity during lectures).	0.0%	10.0%
	Assessment of the ability to analyze global digital transformation processes and critically evaluate the reliability of information sources based on problem-based questions (exam).	60.0%	50.0%
