

## Subject card

Subject name and code	Construction on Site Training, PG_00055688						
Field of study	Architecture						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2026/2027		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Technical Fundamentals of Architectural Design -> Faculty of Architecture -> Faculties of Gdańsk University of Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. arch. Bogusława Konarzewska					
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	0.0	0.0	0
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	0	2.0		48.0		50
Subject objectives	The student learns about modern technologies used in the construction site. He gets to know the scope of work of a construction foreman and construction manager.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_W02] knows and understands the rules of gathering information and their interpretation as a part of project concept preparation; issues related to architecture and urban planning in the field of simple design problems solving	knows and understands the methods of organizing and conducting the design and investment process, as well as the role of the architect in this process; prepares, based on the original design concept, the basic elements of architectural and construction documentation, skilfully applies construction solutions, designs basic construction elements, selects materials and construction products depending on their type and properties.			[SW3] Assessment of knowledge contained in written work and projects [SW2] Assessment of knowledge contained in presentation		
	[K6_K01] is ready to comply with the principles of professional ethics and take responsibility for his/her actions	is ready to work on a construction site in the field of architectural issues; practically evaluates the basic building systems and their impact on the safety of human life and health as well as the safety of property and environmental protection. The student describes the technological processes taking place during the erection of a building object.			[SK2] Assessment of progress of work [SK5] Assessment of ability to solve problems that arise in practice		
Subject contents							
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade		
		100.0%			100.0%
