

Subject card

Subject name and code	Linear algebra, PG_00021020						
Field of study	Mathematics						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2026/2027		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	1	ECTS credits			5.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Divison of Dynamical Systems -> Institute of Applied Mathematics -> Faculty of Applied Physics and Mathematics -> Faculties of Gdańsk University of Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr Joanna Cyman					
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	30.0	0.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	60	5.0		60.0		125
Subject objectives	Basic notions of linear algebra						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	K6_U08	complex numbers, determinants, matrices,			[SU4] Assessment of ability to use methods and tools		
	K6_W04	formulates theorems and definitions			[SW1] Assessment of factual knowledge		
	K6_U03	proper use of algebraic objects			[SU3] Assessment of ability to use knowledge gained from the subject		
	K6_W07	linear properties in calculus and other parts of mathematics			[SW1] Assessment of factual knowledge		
K6_U01	proving simple properties of matrices, linear independence of vectors,			[SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools			

Subject contents	<p>Course content – lecture Complex numbers. Operations on complex numbers. Solving algebraic equations in the complex domain. Different forms of a complex number. Geometric interpretation, Gaussian plane. powers of numbers, n-th root. The field of complex numbers. Complex polynomials. Fundamental theorem of algebra.</p> <p>Matrix calculus. Operations on matrices. Determinants. Laplace expansion. Inverse matrix. Matrix order, elementary matrix transformations.</p> <p>Systems of linear equations. Cramer's system of equations. The existence of solutions to a system of linear equations, the Kronecker-Capelli theorem. Gauss Jordan method.</p> <p>Basic algebraic structures. Groups, rings, bodies. Definitions and examples.</p> <p>Vector space. Definition of vector space and subspace. Testing the linear independence of vectors.</p>											
Prerequisites and co-requisites												
Assessment methods and criteria	<table border="1" data-bbox="448 741 1477 846"> <thead> <tr> <th data-bbox="448 741 794 775">Subject passing criteria</th> <th data-bbox="794 741 1141 775">Passing threshold</th> <th data-bbox="1141 741 1477 775">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="448 775 794 808">activity</td> <td data-bbox="794 775 1141 808">30.0%</td> <td data-bbox="1141 775 1477 808">20.0%</td> </tr> <tr> <td data-bbox="448 808 794 846">2 written tests</td> <td data-bbox="794 808 1141 846">50.0%</td> <td data-bbox="1141 808 1477 846">80.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	activity	30.0%	20.0%	2 written tests	50.0%	80.0%
Subject passing criteria	Passing threshold	Percentage of the final grade										
activity	30.0%	20.0%										
2 written tests	50.0%	80.0%
