

## Subject card

Subject name and code	Automation and Control Engineering, PG_00055965						
Field of study	Power Engineering						
Date of commencement of studies	October 2026	Academic year of realisation of subject				2028/2029	
Education level	first-cycle studies	Subject group				Optional subject group Subject group related to scientific research in the field of study	
Mode of study	Full-time studies	Mode of delivery				at the university	
Year of study	3	Language of instruction				Polish	
Semester of study	6	ECTS credits				4.0	
Learning profile	general academic profile	Assessment form				assessment	
Conducting unit	Department of Control Engineering -> Faculty of Electrical and Control Engineering -> Faculties of Gdańsk University of Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Jacek Zawalich					
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	15.0	15.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	45	6.0		49.0	100	
Subject objectives	The aim of the course is to provide theoretical and practical knowledge in the field of construction, design and servicing of automated facilities and technical processes in industrial conditions with the use of computer hardware and engineering software.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_U02] is able to apply the learned mathematical methods to the analysis and design of elements, systems and energy systems	The student solves tasks in the field of design, modeling and simulation of systems and automation systems used in the power industry.			[SU1] Assessment of task fulfilment		
	[K6_W03] knows the basics of automation and automatic regulation, knows the principles of the selection of electrical devices, drive systems and their control	Student defines, distinguishes and classifies basic automation objects. The student presents the basic methods of modeling, simulation and control of technical objects together with the principles of selecting their elements.			[SW3] Assessment of knowledge contained in written work and projects		
Subject contents	<p>Course content – lecture LECTURE Structures of control systems for objects and technical processes in the power industry. Examples of industrial control systems. Types of industrial measuring, executive and control devices, their selection and basic characteristics. Methods of identification, modeling and simulation of objects and energy automation systems. Power system automation. Automated power plants, automatic generating sets, automatic synchronization of generators, active and reactive power distribution.</p> <p>LABORATORY Designing control and monitoring systems for automated energy systems, based on programmable controllers and a visualization system. Analysis of the operation of the selected system, technical assumptions, defining the functions implemented in the programmable controller and visualization systems, control algorithms, technical documentation.</p> <p>EXERCISES Mathematical methods for the analysis and design of automation components and systems used in energy systems. Methods of selection of used measuring and executive equipment.</p>						

Prerequisites and co-requisites	Knowledge of the Fundamentals of Automation.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Exercises	60.0%	20.0%
	Laboratory	60.0%	20.0%
	Lecture	60.0%	60.0%

	eResources addresses		
Example issues/ example questions/ tasks being completed	Carry out an analysis of the water level control system in the tank. Design a heating control system in the production hall. Develop alarm algorithms in the turbogenerator control system.		
Practical activities within the subject	Not applicable		

Document generated electronically. Does not require a seal or signature.
