

Subject card

Subject name and code	Microprocessor Technologies, PG_00038439						
Field of study	Electrical Engineering						
Date of commencement of studies	October 2026	Academic year of realisation of subject				2027/2028	
Education level	first-cycle studies	Subject group					
Mode of study	Full-time studies	Mode of delivery				at the university	
Year of study	2	Language of instruction				Polish	
Semester of study	4	ECTS credits				4.0	
Learning profile	general academic profile	Assessment form				assessment	
Conducting unit	Department of Power Electronics and Electrical Machines -> Faculty of Electrical and Control Engineering -> Faculties of Gdańsk University of Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Artur Cichowski				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	30.0	0.0	0.0	60
	E-learning hours included: 0.0						
	eNauczenie source address: https://enauczenie.pg.edu.pl/moodle/course/view.php?id=11798						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	60	4.0		36.0		100
Subject objectives	The objective of the course is for students to acquire knowledge and competencies in microprocessor techniques.						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	K6_K01		is aware of the necessity to extend their knowledge in digital techniques and microprocessors			[SK5] Assessment of ability to solve problems that arise in practice [SK4] Assessment of communication skills, including language correctness	
	K6_U01		can design and analyze digital circuits, is able to program microprocessors in C language			[SU4] Assessment of ability to use methods and tools [SU3] Assessment of ability to use knowledge gained from the subject [SU1] Assessment of task fulfilment [SU5] Assessment of ability to present the results of task	
	K6_W07		has knowledge of design and analyze digital circuits and programming microcontrollers in C language			[SW3] Assessment of knowledge contained in written work and projects	
Subject contents	<p>Course content – lecture LECTURE Fundamentals of digital electronics: combinational logic design, sequential logic design, basic medium-scale integration logic circuits (multiplexers/demultiplexers, decoders, adders, memories, registers, counters). Architectures of microprocessors and microcontrollers. Central processing unit, bus, memory, input/output systems, registers, program counter, stack / stack pointer, interrupts. C language programming of microprocessors (based on the STM32L496ZGT6 microcontroller in the STM32CubeIDE environment). Subroutines. Interrupt service routines. LABORATORY Use of the Quartus II design environment for the design, FPGA implementation and testing of basic logic circuits (gates, flip-flops, registers, counters, memories, and other combinational and sequential circuits). C-language programming of the STM32L496ZGT6 microcontroller. Use of I/O ports, interrupt service routines, buttons and switches handling, Software implementation of a daily clock with seven-segment displays, alphanumeric display routines, configuring and use of the embedded A/D converters and PWM channels.</p>						
Prerequisites and co-requisites							

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Practical exercise	60.0%	80.0%
	Midterm colloquia	60.0%	20.0%

WNT, Warszawa 1998.	
	eResources addresses		
Example issues/ example questions/ tasks being completed	1) Minimize the boolean function defined by the given Karnaugh map. Draw the corresponding logic diagram using NAND gates. 2) Design a sequential logic circuit defined by the given state transition diagram. 3) Write a program to control the LEDs as a function of logical operations of the microcontroller inputs. 4) Write a LED control program with variants of preset sequences changed in case of pressing monostable switches.		
Practical activities within the subject	Not applicable		

Document generated electronically. Does not require a seal or signature.
