

Subject card

Subject name and code	Technical and Computer Metrology, PG_00064119						
Field of study	Mechanical and Medical Engineering						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2026/2027		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			7.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology -> Faculties of Gdańsk University of Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Stefan Dzionk					
	Teachers	dr hab. inż. Stefan Dzionk dr inż. Aleksandra Mirowska dr inż. Mateusz Wrzochal mgr inż. Anna Janeczek inż. Mieszko Jarzębowski dr Zoya Karatkevich dr inż. Łukasz Pawłowski					
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	30.0	0.0	0.0	75
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	75	13.0		87.0	175	
Subject objectives	Recognition with the basic principles of metrology and preparing to conduct measurements of mechanical and geometrical quantities with the analysis of the results. Rules for determining the accuracy, tolerate and fits of machine parts. Knowledge of the methods of measurement and measuring instruments.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K6_U07] is able to assess whether proposed methods and tools can be used in practice to solve simple engineering task related to machine design, manufacturing and utilization	The student selects an appropriate measuring instrument to measure a given quantity measured using CNC measuring systems. The student conducts simulation analyses, prepares a measurement program in a computer environment, and performs measurements. The student analyzes the measurement results. The student calculates errors and uncertainties of measurements. The student has knowledge of methods, errors and uncertainty of measurement, specification of product geometry and assessment of their accuracy and surface structure.	[SU4] Assessment of ability to use methods and tools [SU3] Assessment of ability to use knowledge gained from the subject [SU2] Assessment of ability to analyse information
	[K6_K02] is aware of importance of professional dealing and to fulfill ethics obligations, he/she understands other (nontechnical) abilities of mechanical engineering professional, their influence on the society and security of environment, he/she is aware of importance of social cooperation	The student explains the structure and principles of operation of measuring instruments. The student selects an appropriate measuring instrument to measure a given measured quantity. The student measures basic geometric quantities.	[SK5] Assessment of ability to solve problems that arise in practice [SK1] Assessment of group work skills [SK2] Assessment of progress of work
Subject contents	<p>Course content – lecture</p> <p>Basic concepts in metrology: measurement, units of measurement, standards and instruments. Accuracy and uncertainty. Geometric structure of the product (Geometric Product Specifications - GPS). Basics of tolerances, deviations and fits. Geometric tolerances. General tolerances. Tolerances for linear and angular dimensions without individual tolerance markings. Basics of measurements (repeatability and reproducibility of the measuring device). Surface texture. Metrological methods and equipment and principles of its selection. Laboratory: Measurements of external, internal, mixed and intermediate dimensions. Measurements of angles, cones, . Surface texture and contour measurements. Measurements using altimeters. 2D measurements. Coordinate measurement technique (manual and CNC measuring machines). Exercises: Measurements and their uncertainty (Measurement errors, uncertainty, uncertainty budget and statistical analysis of measurement results). Tolerances and fits. Dimensional chains. Tolerance of component dimensions, interchangeability.</p>		
Prerequisites and co-requisites	Basic knowledge of technical drawing		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Laboratory	60.0%	30.0%
	Tutorial	60.0%	30.0%
	Written exam	60.0%	40.0%
