

Subject card

Subject name and code	DRIVES SUPPLIED BY POWER CONVERTERS II, PG_00022579						
Field of study	Electrical Engineering						
Date of commencement of studies	October 2026	Academic year of realisation of subject				2027/2028	
Education level	second-cycle studies	Subject group				Specialty subject group Subject group related to scientific research in the field of study	
Mode of study	Part-time studies	Mode of delivery				at the university	
Year of study	2	Language of instruction				Polish	
Semester of study	3	ECTS credits				2.0	
Learning profile	general academic profile	Assessment form				assessment	
Conducting unit	Department of Electric Drives and Energy Conversion -> Faculty of Electrical and Control Engineering -> Faculties of Gdańsk University of Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	prof. dr hab. inż. Jarosław Guziński					
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	10.0	0.0	10.0	0.0	0.0	20
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	20		4.0		26.0	50
Subject objectives	The aim of the course is to get knowledge on advanced topics in the field of electrical drives operating with power electronics converters.						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	[K7_K03] can interact and work in a group assuming various roles and identify priorities for the achievement of a specific task						
	[K7_W06] has in-depth knowledge of industrial electronics, microprocessor control systems, programmable logic systems and printed circuit design and prototyping computer-aided prototyping						
	[K7_U07] is able to analyse, calculate, design, program and test converters, drive systems, control systems and state observers		Student can design a converter drive system of a squirrel-cage induction motor with the use of LC filter			[SU1] Assessment of task fulfilment	

Subject contents	<p>Course content – lecture</p> <p><b>Lecture</b> Introduction to advanced topics of electrical drives with converter type supply. Simulation models of induction machines and permanent magnet synchronous (PMSM). Power electronic converters in electric drives systems: classification, pulse width modulation, three-phase voltage inverter, multilevel inverters, Z inverters, quasi-Z inverters, the dead time. Current source PWM inverters. Field oriented control (FOC) of induction motors. PMSM motor control. The direct torque control (DTC) of induction machines: base structure, modifications. DTC control of PMSM. Nonlinear control of induction machines. Electric drives with multi-phase machines (&gt; 3 phase). Sensorless control. Selected topics on electric drives with voltage inverter output filters. Electric drives with medium voltage and high power machines. The use of new semiconductor materials in converter drive systems: silicon carbide SiC, gallium arsenide GaAs.</p> <p><b>Laboratory</b></p> <ol style="list-style-type: none"> <li>1. Circuit models of electrical machines.</li> <li>2. Power electronics converters and control methods.</li> <li>3. Electric drives with induction motor, inverter and output filter (Control methods V/f and FOC).</li> <li>4. Electric drive with induction motor, inverter and output filter (Control method DTC-SVM).</li> <li>5. Investigations of effects related to leakage currents and inverter output voltage filtering.</li> <li>6. Investigations of matrix converter with output voltage and input power factor control.</li> <li>7. Transistorized current source inverter with PWM.</li> </ol>														
Prerequisites and co-requisites	<p>General knowledge on electrical machines, power converters and electric drives based on the field of Electrical Machines, Power Electronics and Electric Drives courses for I cycle engineering studies. Additionality is advisable to complete course Electric Drives with Power Electronics Supply I for II cycle of engineering studies.</p>														
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="453 754 794 786">Subject passing criteria</th> <th data-bbox="799 754 1141 786">Passing threshold</th> <th data-bbox="1145 754 1489 786">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="453 792 794 824">Project</td> <td data-bbox="799 792 1141 824">60.0%</td> <td data-bbox="1145 792 1489 824">35.0%</td> </tr> <tr> <td data-bbox="453 831 794 862">Practical exercises at laboratory</td> <td data-bbox="799 831 1141 862">60.0%</td> <td data-bbox="1145 831 1489 862">25.0%</td> </tr> <tr> <td data-bbox="453 869 794 900">Midterm exams</td> <td data-bbox="799 869 1141 900">60.0%</td> <td data-bbox="1145 869 1489 900">40.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Project	60.0%	35.0%	Practical exercises at laboratory	60.0%	25.0%	Midterm exams	60.0%	40.0%
