

Subject card

Subject name and code	Mathematics, PG_00054682						
Field of study	Biotechnology						
Date of commencement of studies	October 2026	Academic year of realisation of subject				2026/2027	
Education level	first-cycle studies	Subject group				Obligatory subject group in the field of study	
Mode of study	Full-time studies	Mode of delivery				at the university	
Year of study	1	Language of instruction				Polish	
Semester of study	1	ECTS credits				9.0	
Learning profile	general academic profile	Assessment form				exam	
Conducting unit	Mathematics Center -> Vice-Rector For Education						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Anita Dąbrowicz-Tlałka				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	45.0	45.0	0.0	0.0	0.0	90
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	90		10.0		125.0	225
Subject objectives	Students obtain competence in the range of using methods of mathematical analysis and linear algebra and knowledge how to solve simple problems that can be found in the field of engineering.						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	K6_W01		Student mentions basic properties of elementary functions. Student solves equations and inequalities with elementary functions. Student gives the definition of basic notions of differential calculus. Student uses basic notions and formulas of differential calculus. Student determines intervals of monotonicity of a given functions and its extrema. Students calculates antiderivatives using the substitution method of integration and integration by parts. Student applies definite integrals to solving geometrical problems. Student uses the basic operations on complex numbers.			[SW1] Assessment of factual knowledge	
	K6_U01		Student recognizes the importance of skillful use of basic mathematical apparatus in terms of study in the future. Student is able to process the acquired information, analyze and interpret it, draw conclusions and reason opinions.			[SU4] Assessment of ability to use methods and tools [SU2] Assessment of ability to analyse information [SU1] Assessment of task fulfilment	

Subject contents	<p>Course content – lecture The sets of numbers and set notation. Basic mathematics symbols.</p> <p>Functions of one variable:</p> <ul style="list-style-type: none"> <li>• definitions, graphs, properties, continuity, limits</li> <li>• absolute value, equations and inequalities</li> <li>• polynomials, rational functions, power functions, trigonometric and inverse trigonometric functions, exponential and logarithmic functions</li> <li>• equations and inequalities involving these functions</li> <li>• applications to mathematical modeling</li> </ul> <p>Infinite number sequences, limits and continuity of functions</p> <ul style="list-style-type: none"> <li>• boundedness and monotonicity</li> <li>• limits</li> <li>• continuity of functions, types of discontinuities and their interpretation</li> </ul> <p>Single variable calculus:</p> <ul style="list-style-type: none"> <li>• definition of the derivative</li> <li>• Rolle's and Lagrange's theorems and their applications</li> <li>• L'Hospital's Rule</li> <li>• monotonicity and local/global extrema (optimization problems)</li> <li>• higher order derivatives</li> <li>• concavity, inflection points</li> <li>• applications of single variable differential calculus to curve sketching, related rates and approximation problems</li> <li>• applications of differential calculus to other fields (e.g. chemistry, physics, biology)</li> <li>• definite and indefinite integral, Fundamental Theorem of Calculus</li> <li>• basic integration formulas</li> <li>• integration by substitution, by parts, by partial fractions</li> <li>• applications of integral calculus to other fields</li> </ul> <p>Complex numbers</p>														
Prerequisites and co-requisites															
Assessment methods and criteria	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 33%;">Subject passing criteria</th> <th style="width: 33%;">Passing threshold</th> <th style="width: 33%;">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td>Written exam</td> <td>50.0%</td> <td>50.0%</td> </tr> <tr> <td>Midterm exams</td> <td>0.0%</td> <td>40.0%</td> </tr> <tr> <td>Activity during classes</td> <td>0.0%</td> <td>10.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Written exam	50.0%	50.0%	Midterm exams	0.0%	40.0%	Activity during classes	0.0%	10.0%
Subject passing criteria	Passing threshold	Percentage of the final grade													
Written exam	50.0%	50.0%													
Midterm exams	0.0%	40.0%													
Activity during classes	0.0%	10.0%
