

## Subject card

Subject name and code	Software Licensing, PG_00064507						
Field of study	Informatics						
Date of commencement of studies	February 2027	Academic year of realisation of subject			2027/2028		
Education level	second-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			English		
Semester of study	2	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Computer Architecture -> Faculty of Electronics Telecommunications and Informatics -> Faculties of Gdańsk University of Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Tomasz Boiński					
	Teachers	mgr inż. Hammed Mojeed dr inż. Tomasz Boiński					
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	15.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		4.0		16.0	50
Subject objectives	The subject aims at informing students about legal background of using OS software and make them aware of the need to follow them.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K7_W04] knows and understands, to an increased extent, the principles, methods and techniques of programming and the principles of computer software development or programming devices or controllers using microprocessors or other elements or programmable devices specific to the field of study, and organization of work of systems using computers or such devices	Student knows and understands impact of software licenses on software development and ability to use certain components	[SW1] Assessment of factual knowledge
	[K7_U09] can carry out a critical analysis of the functioning of existing technical solutions and assess these solutions, as well as apply experience related to the maintenance of advanced technical systems, devices and facilities typical for the field of studies, gained in the professional engineering environment	Student can critically analyze legal aspect of the software and can match software components correctly aligned in term of legal conditions	[SU3] Assessment of ability to use knowledge gained from the subject
	[K7_U07] can apply advanced methods of process and function support, specific to the field of study	Student can correctly select open software components to realize computer processes	[SU2] Assessment of ability to analyse information
[K7_U71] is able to apply knowledge from humanistic, social, economic or legal sciences in order to solve problems	Student differentiate software licences and their impact on the software development	[SU1] Assessment of task fulfilment	
Subject contents	<p>Course content – lecture</p> <ol style="list-style-type: none"> <li>1. Open Source a Free Software</li> <li>2. Different kind of software licenses</li> <li>3. Management of a distributed software development project</li> <li>4. Rules of bundling software into different Linux distributions</li> <li>5. Development cycle of Linux distributions</li> <li>6. Positive and negative aspects of Closed and Open Source</li> <li>7. Intellectual property and patent law</li> <li>8. Models of software patents in different countries</li> <li>9. Open Source based commercial applications and systems</li> <li>10. Formats and protocols standardization process</li> <li>11. Perspectives for Open Source</li> <li>12. Final test</li> </ol>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Presentation	50.0%	50.0%
	Midterm colloquium	50.0%	50.0%
