

Subject card

Subject name and code	Sensors and Actuators, PG_00048150						
Field of study	Electronics and Telecommunications						
Date of commencement of studies	October 2026	Academic year of realisation of subject				2029/2030	
Education level	first-cycle studies	Subject group				Optional subject group Subject group related to scientific research in the field of study	
Mode of study	Full-time studies	Mode of delivery				at the university	
Year of study	4	Language of instruction				Polish	
Semester of study	7	ECTS credits				4.0	
Learning profile	general academic profile	Assessment form				assessment	
Conducting unit	Department of Signals and Systems -> Faculty of Electronics Telecommunications and Informatics -> Faculties of Gdańsk University of Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Jan Schmidt				
	Teachers		dr inż. Jan Schmidt				
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	30.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	45	4.0		51.0	100	
Subject objectives	The aim is the education of an engineer with knowledge and skills of basic and directional range of sensors and actuators in marine electronics devices. The aim is also to prepare to take up studies on the second stage.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W03] knows and understands, to an advanced extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum		The student knows the operating principles of the actuators.		[SW1] Assessment of factual knowledge		
Subject contents	<p>Course content – lecture</p> <ol style="list-style-type: none"> 1. Place and functions of measurement and actuator systems in industrial real time systems 2. Classification of sensors and technologies of manufacturing. Intelligent sensors 3. Sensors of fundamental mechanical quantities and environmental parameters 4. Chemical sensors - atmosphere and water monitoring, measurement of fumes concentration and explosion proof protection 5. Magnetic field sensors 6. Applications of magnetic field sensors 7. Optical and fiber-optic sensors 8. Sensors used in control of moving objects and robotics: gyro sensors and compasses, tilt angle sensors 9. Sensors used in control of moving objects and robotics, ultrasonic sensors of object velocity, echo sounder and sonar sensors 10. Types of actuators: notions of controller, actuator and power amplifier 11. Types of controllers and examples of construction 12. Classification of actuators related to the kind of energy used. Examples of construction solutions of hydraulic and pneumatic actuators 13. Direct current (DC) motors 14. Three-phase alternative current (AC) motors 15. Single-phase induction AC motors 16. Stepping motors – basics of operation 17. Types and features of stepping motors 18. Controllers for DC and AC motors 19. Control of stepping motors. Microstepping drive 						

Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Colloquium at the time of the semester	60.0%	50.0%
	Reports of laboratory exercises	60.0%	50.0%
Recommended reading	Basic literature	<ol style="list-style-type: none"> 1. Turkowski M. Przemysłowe sensory i przetworniki pomiarowe, Oficyna Wydawnicza Politechniki Warszawskiej, Warszawa 2000 (Czytelnia na Wydziale Mechanicznym PG) 2. Nawrocki W. Sensory i systemy pomiarowe. Wydaw. Politechniki Poznańskiej, 2001(Czytelnia na Wydziale Elektrotechniki i Automatyki, Magazyn Biblioteki Głównej) 3. Zajda Z., Żebrowski L. Urządzenia i układy automatyki. Wyd. Pol.
