

Subject card

Subject name and code	Networked Mobile Technologies, PG_00047765						
Field of study	Informatics						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2027/2028		
Education level	second-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Part-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Department of Geoinformatics -> Faculty of Electronics Telecommunications and Informatics -> Faculties of Gdańsk University of Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Marcin Kulawiak				
	Teachers		dr hab. inż. Marcin Kulawiak				
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	18.0	0.0	0.0	15.0	0.0	33
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	33	10.0	57.0	100		
Subject objectives	The students will learn about web technologies used in mobile systems. The technologies involve Bluetooth, WiFi, GSM/GPRS, 3G, 4G etc.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_W03] knows and understands, to an increased extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum		The student knows and understands the the principles of wireless communication methods on mobile devices.		[SW1] Assessment of factual knowledge		
	[K7_W08] knows and understands, to an increased extent, the fundamental dilemmas of modern civilisation, the main development trends of scientific disciplines relevant to the field of education		The student knows and understands the principles of wireless communication on mobile devices.		[SW1] Assessment of factual knowledge		
Subject contents	Course content – lecture 1. GSM network architecture 2. Aspects of handling bluetooth connections in mobile devices 3. Aspects NFC connection handling in mobile devices 4. Connections using sockets on mobile devices 5. Other standards of wireless connections on mobile devices 6. Using Web services on mobile devices 7. Programming web applications for mobile devices 8. Architecture of Web services created in JEE. 9. Elements of HTML5 in the context of mobile devices. 10. Other available network solutions for mobile platforms.						
Prerequisites and co-requisites	No requirements						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Written exam		60.0%		50.0%		
	Project		60.0%		50.0%		

Recommended reading	Basic literature	Creating a Web service with JEE and NetBeans http://netbeans.org/kb/docs/websvc/jax-ws.html Creating an Android Web service client with ksoap2 http://www.ibm.com/developerworks/webservices/library/ws-android/index.html Android application development http://developer.android.com/guide/components/index.html
	Supplementary literature	The J2EE Tutorial by Eric Armstrong, Jennifer Ball, Stephanie Bodoff, Debbie Bode Carson, Ian Evans Dale, Green Kim Haase, Eric Jendrock
	eResources addresses	
Example issues/ example questions/ tasks being completed	Creating a Web service for mobile devices. Describing the evolution of packet communication standards on mobile devices.	
Practical activities within the subject	Not applicable	

Document generated electronically. Does not require a seal or signature.
