

Subject card

Subject name and code	Mechanics of Materials B, PG_00069308						
Field of study	Civil Engineering						
Date of commencement of studies	October 2023	Academic year of realisation of subject				2026/2027	
Education level	first-cycle studies	Subject group					
Mode of study	Full-time studies	Mode of delivery				at the university	
Year of study	4	Language of instruction				Polish	
Semester of study	7	ECTS credits				1.0	
Learning profile	general academic profile	Assessment form				assessment	
Conducting unit	Department of Mechanics of Materials and Structures -> Faculty of Civil and Environmental Engineering -> Faculties of Gdańsk University of Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	prof. dr hab. inż. Jacek Chróścielewski					
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
	eNauczanie source address: <a href="https://enauczanie.pg.edu.pl/2025/course/view.php?id=2230">https://enauczanie.pg.edu.pl/2025/course/view.php?id=2230</a>						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	15	1.0	9.0	25		
Subject objectives	Determining the influence of time and environment on the strength properties of materials. Discussing the concepts of creep and relaxation. Discussing fracture. Understanding materials such as composites and auxetics.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_W07] Understand the investment's impact on the environment and the interrelationships and dependencies between the building structure and the natural environment	The student has knowledge of the impact of materials used in the investment process on the environment			[SW1] Assessment of factual knowledge		
	[K6_K01] Is aware of the key aspects of professional, ethical and social responsibility related to management, business operation, decision making and opinion formulation in civil engineering.	The student has knowledge of professional, ethical and social responsibility related to activities in the construction industry			[SK3] Assessment of ability to organize work [SK5] Assessment of ability to solve problems that arise in practice		
	[K6_U06] Conduct engineering activities in civil engineering subject area, using and applying practical knowledge and understanding of materials, equipment and tools, processes and technologies.	The student solves design tasks and problems. He or she is able to prepare a report on the activities performed, such as calculations or design tasks.			[SU1] Assessment of task fulfilment		
	[K6_W06] Demonstrates practical knowledge and understanding of materials, devices and tools, processes and technologies in the field of civil engineering (and their limitations).	The student has theoretical and practical knowledge of materials used in the construction industry, understands their properties, and is able to determine them.			[SW1] Assessment of factual knowledge		
	[K6_U07] Design and build engineering structures in a sustainable manner, with care for the natural environment and a minimum carbon footprint	The student is able to design building structures made of various building materials, knows their properties and impact on the natural environment.			[SU1] Assessment of task fulfilment		

Subject contents	<p>Course content – lecture</p> <p>The influence of time and environment on the strength properties of materials.          Selected issues related to creep and relaxation.          Selected issues related to fracture.          Selected issues related to the stability of frame elements.          Selected issues related to modern materials, such as composites and auxetics.</p>								
Prerequisites and co-requisites	<p>Basic knowledge of:</p> <ul style="list-style-type: none"> <li>- structural mechanics</li> <li>- strength of materials</li> <li>- experimental methods in the strength of materials</li> </ul>								
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="453 636 790 667">Subject passing criteria</th> <th data-bbox="799 636 1139 667">Passing threshold</th> <th data-bbox="1144 636 1492 667">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="453 669 790 701">test</td> <td data-bbox="799 669 1139 701">60.0%</td> <td data-bbox="1144 669 1492 701">100.0%</td> </tr> </tbody> </table>	Subject passing criteria	Passing threshold	Percentage of the final grade	test	60.0%	100.0%		
Subject passing criteria	Passing threshold	Percentage of the final grade							
test	60.0%	100.0%
