GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Legal Aspects of Technology, PG_00074008		
Field of study	Economic Analytics		
Date of commencement of studies	October 2025	Academic year of realisation of subject	2026/2027
Education level	second-cycle studies	Subject group	Optional subject group
Mode of study	Part-time studies (on-line)	Mode of delivery	at the university
Year of study	2	Language of instruction	Polish
Semester of study	4	ECTS credits	3.0
Learning profile	general academic profile	Assessment form	assessment
Conducting unit	Department of Informatics In Management -> Faculty of Management and Economics -> Faculties of Gdańsk University of Technology		
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Magdalena Ciesielska	
	Teachers

E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	24	3.0	48.0	75

Subject objectives

The course prepares students to identify, analyse and assess the legal, economic and ethical conditions for using digital technologies in business, with particular emphasis on working with data and artificial intelligence systems.

In a remote team project, students carry out a compliance analysis of a selected technological or analytical solution. They formulate business recommendations and defend them in an online discussion, critically interpreting legislation, supervisory authority guidelines and industry sources.

Learning outcomes

Course outcome	Subject outcome	Method of verification
[K7_U02] presents logical and well-founded arguments regarding obtained results through the analysis and synthesis of information in various business contexts, critically evaluating their interpretation.	Can carry out a legal compliance analysis of a selected solution (AI system risk classification, simplified DPIA, obligations map) and synthesise it into recommendations for management.	[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information [SU5] Assessment of ability to present the results of task
[K7_W05] has in-depth knowledge of integrating economic, legal, and ethical aspects in analyses and their application in entrepreneurial activities.	Knows and understands the key EU and Polish regulations on digital technologies (GDPR, AI Act, Data Act, NIS2/national cybersecurity system, copyright, cloud contracts) and their scope of application to businesses.	[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects

Subject contents

Course content – project

1. Personal data in analytics
2. Data risk assessment
3. AI Act – is it an AI system, and what risk level?
4. AI Act – who is responsible for what?
5. GenAI and intellectual property
6. Data and cloud in contracts
7. Cybersecurity and incidents
8. Ethics, synthesis and project defence

Prerequisites and co-requisites

- Basic knowledge of economics, management and data analysis at first-cycle (Bachelor's) level.
- General familiarity with information systems and data processing in a company.
- No prior legal education is required.
