Subject objectives

The Team Research Project is designed to prepare Students for future work in a research team and to teach them to meet their obligations under the agreed timetable in a timely manner.

Learning outcomes

Course outcome	Subject outcome	Method of verification
[K7_W101] is able to make an in-depth identification of key objects and phenomena related to the field of study, as well as theories that describe them and applicable analytical and design methods	Analyses and prepares solutions to research problems using using analytical and design methods.	[SW3] Assessment of knowledge contained in written work and projects
[K7_K101] acknowledges the importance of knowledge related to the field of study in solving cognitive and practical problems, critically assessing the information obtained	Critically analyse possible and proposed solutions	[SK2] Assessment of progress of work
[K7_U101] is able to formulate complex research problems and adopts appropriate methods, obtaining innovative solutions, cooperating with other people, both as a leader and a team member	Works as part of a team to select appropriate technologies and methods to solve a research problem.	[SU1] Assessment of task fulfilment

Subject contents

Course content – lecture

Lecture:

Project management. Scheduling. Team communication.

Course content – project

Project:

Project requirements as defined by the project supervisor.

Prerequisites and co-requisites

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
		100.0%	30.0%
		50.0%	20.0%
		100.0%	25.0%
		100.0%	25.0%
Recommended reading	Basic literature	-	
	Supplementary literature	As directed by the research topic supervisor.	
	eResources addresses		
Example issues/ example questions/ tasks being completed	According to project requirements and assumptions		
Practical activites within the subject	Not applicable
